STORAGE AND DISPOSAL**KEEP OUT OF REACH OF CHILDREN**

Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight.

Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty containers 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory Government Regulations. Do not burn empty containers or product.

For Mini Bulk Returnable Containers

Store the original sealed Envirodrum in a dry, cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the Envirodrums with water or any other foreign matter. After each use of the product, please ensure the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrums have been used, please return the empty Envirodrums to the point of purchase. The Envirodrum remains the property of CropSure Pty Ltd.

For Refillable Containers

Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

SAFETY DIRECTIONS

Harmful if swallowed. Attacks eyes. Will irritate the skin. When opening the container, preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and goggles. If product on skin, immediately wash area with soap and water. If product or spray in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms, and face thoroughly with soap and water. After each day's use wash gloves, goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126, New Zealand 0800 764 766.

SAFETY DATA SHEET (SDS)

Additional information is listed in the Safety Data Sheet (SDS), which is available from the supplier.

CONDITIONS OF SALE

CropSure Pty Ltd shall not be liable for any loss, injury, damage or death whether consequential or otherwise, whatsoever or whosoever arising whether through negligence or otherwise, in connection with the sale, supply, use or application of this product, except for any provisions or rights under the Australian Consumer Law which cannot be excluded. The supply of this product is on the express condition that the purchaser does not rely on CropSure Pty Ltd skill of judgement in the purchasing or using the same and every person using this product does so at their own risk absolutely. The Buyer and user assume all risk of use and/or handling and/or storage of this material when such use and/or handling and/or storage is contrary to label instructions. This product is designed to be only used according with the label directions.

POLICE OR FIRE BRIGADE

24HR Medical Emergency Information:
AU +61 1800 951 288
NZ +64 800 700 112

Harmful if swallowed, in contact with skin or if inhaled. Very toxic to aquatic life with long lasting effects. Avoid breathing fumes, mists, vapours or spray. Do not get in eyes, on skin, or on clothing. Wash contacted areas thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well ventilated area. Wear protective gloves, protective clothing and eye or face protection. Call a POISON CENTRE or doctor if you feel unwell. Wash contaminated clothing before reuse. IF SWALLOWED: Call a POISON CENTRE or doctor if you feel unwell. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. IF ON SKIN: Wash with plenty of soap and water. IF INHALED: Remove victim to fresh air and keep comfortable for breathing. In case of fire: Use carbon dioxide, dry chemical, foam, water fog, to extinguish. Protect from sunlight. Store in a dry place. Store in a closed container. Store in a well-ventilated place. Keep cool. Dispose of contents and containers as specified on the registered label.

DIRECTIONS FOR USE**RESTRAINTS**

DO NOT apply if crop or weeds are stressed due to dry or excessively moist conditions.

DO NOT apply if rain is likely within 6 hours.

SPRAY DRIFT RESTRAINTS

Specific definitions for terms used in this section of the label can be found at apvma.gov.au/spraydrift

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift.

Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings one to two hours before sunset and persist until one to two hours after sunrise.

1. FIELD CROPS

SITUATION & CROP	WEEDS	STATE	RATE	CRITICAL COMMENTS
Wheat, Barley, Oats, Triticale	Refer to Weed Table	SA, TAS only	460mL-1.45L/ha	Apply through the tillering stage after the crop plants have 5 leaves and before they commence jointing.
		QLD only		Apply from early tillering (4-5 fully emerged main stem leaves plus one or more tillers) until before the boot stage (visible swelling of the head at the top of the main stem).
		NSW, ACT only		Apply 460mL rate after crop has reached 5 leaf stage and weeds marked # in weed table have 3-6 leaves. Higher rates after the first node can be felt at the base of a tiller and before swelling of the head can be felt in a tiller.
		VIC only	460-960mL/ha	Apply 460mL rate after crop has reached 2-3 leaf stage and weeds marked # in weed table have 2-4 leaves. Higher rate after the crop plants have 5 leaves to fully tillered.
		WA only	600mL-1.35L/ha	Apply to crop from 5 leaf to Flag leaf emergence. (Z15-37)
Wheat, Barley, Triticale, Cereal rye	Capeweed, Doublegee, Erodium, Mustard, Rapistrum, Wild turnip, Wild radish	WA only	270mL/ha plus 350mL/ha Flowable Diuron	CROP: 3-4 leaf stage. (Z13-14)
			330mL/ha plus 400mL/ha Flowable Diuron	CROP: 4-5 leaf stage. (Z14-15)
				Apply by aircraft or boom with 20-100L/ha water, when most weeds have germinated and are in 2-5 leaf stage. Crop and weeds should be dry at time of application. Some temporary yellowing of crop may occur after application. Undersown sub-clovers may be slightly retarded. DO NOT apply to undersown medics.

	Amsinckia (Yellow burr), Capeweed, Charlock, Dead nettle, Doublegee (Spiny emex, Three-cornered Jack), <i>Erodium</i> spp., Mustard, Turnip weed, White ironweed (Corn gromwell, Sheepweed), Wild radish, Wild turnip	NSW, ACT, VIC only	330mL/ha plus 500mL/ha Flowable Diuron	Apply by boom spray or aircraft when the crop is at the 3-5 leaf stage (NSW and SA only) and 5 leaf stage (VIC only). Weeds must be in the 2-5 leaf stage. DO NOT apply to undersown medic or lucerne. DO NOT use on Kamilaroi, Kite, Olympic or Shortim wheat. DO NOT use on very light sandy soils.
	Capeweed, Mustard, Three-cornered Jack, Turnip weed, Wild radish, Wild turnip, Ward's weed, Common ice plant, Pimpernel	SA only	230mL/ha plus 500mL/ha Flowable Diuron	

SITUATION & CROP	WEEDS	STATE	RATE	CRITICAL COMMENTS
Wheat, Barley, Oats, Triticale	Soldier thistle	SA only	460mL/ha plus 200mL/ha Archer®	Apply to crop at tillering stage after the crop has 5 leaves and before the crop commences jointing.
	Skeleton weed		660mL/ha plus 500mL/ha Archer®	Apply to rosettes from 5-15cm diameter when the crop is between the 5 leaf and late tillering growth stages. It is essential that all the Skeleton weed is emerged and minimum of 5cm diameter which is usually not before August. This rate will provide control of Skeleton weed until harvest and will substantially reduce seed numbers the following season.

SITUATION & CROP	WEEDS CONTROLLED	STATE	WEED STAGE	RATE	CRITICAL COMMENT
Field peas	Prickly lettuce (<i>Lactuca serriola</i>)	NSW, VIC, TAS, SA only	4 leaf	80mL/ha plus 125mL/ha Diflufenican (500g/L)	FIELD PEAS: Apply early post-emergence after the third node stage and before the start of flowering. WARNING: Field peas grown on high pH soils in the presence of free lime may be less tolerant to Diflufenican (500g/L).
			6 leaf	100mL/ha plus 150mL/ha Diflufenican (500g/L)	APPLICATION AND WEED CONTROL: Apply when weeds are actively growing. For optimum results apply 4-6 weeks post-sowing. Application beyond 8 weeks post-sowing may result in reduced levels of weed control. In most situations the rate specified for each weed size will give satisfactory control.
	Charlock (Wild mustard) (<i>Sinapis arvensis</i>)		4 leaf	80mL/ha plus 125mL/ha Diflufenican (500g/L)	Under certain conditions such as: • high crop and weed density, • late season germinations, • abnormal weed growth (including early flowering); higher rates of product (up to the maximum rate of application specified for that weed) may be required.
			6 leaf	100mL/ha plus 150mL/ha Diflufenican (500g/L)	Diflufenican (500g/L) will not effectively control: • regrowth of suppressed weeds, • transplanted weeds, • regrowth from rhizomes or roots, • weeds growing under stress from previous herbicide applications.

SITUATION & CROP	WEEDS CONTROLLED	STATE	RATE	CRITICAL COMMENT
Linseed	Refer to Weed Table	QLD only	460mL-1.45L/ha	Apply when crop is 10-15cm tall with at least 170L/ha of water. DO NOT spray after buds appear. Some wilting effect may be seen following application but crop usually recovers quickly. DO NOT apply by aircraft.
		NSW, ACT, VIC, SA, TAS only	460-730mL/ha	
Sugar Cane	Blue top, Chinese burr, Flannel weed, Gambia pea, Bell vine, Streaked rattle pod, Bindweed, Pink convolvulus, Cupid's flower, Merremia vine, Morning glory	QLD only	930mL/ha	POST-EMERGENT: Apply as a directed inter-row spray. DO NOT exceed rates with phenoxy sensitive varieties.
	As above plus Fat hen, Noogoora burr		1.45L/ha	
Oil-seed Poppies (<i>Papaver somniferum</i>)	Fat hen (<i>Chenopodium album</i>), Spear thistle (<i>Cirsium vulgare</i>)	TAS only	1L/ha	Use only in consultation with the poppy contracting company. Apply at least 1 week after petal fall after poppy seed has been set. Apply by aircraft in 30-40L of water/ha. This treatment will control late germinating weeds if they are green and at the bud or early flowering stage. Spraying at this time will twist weeds below the crop canopy. DO NOT apply in horticultural areas where there is a risk of spray or vapour drift over susceptible crops.
Rice	Dirty Dora, Starfruit, Sedges, Buddah (Butter) pea	NSW only	485-970mL/ha	Apply by aircraft at early/mid tillering stage of rice but not later than panicle initiation. Use 485mL/ha at 35 days after aerial sowing (approx. 2L per rice plant). Use 970mL/ha at 45 days or more after cereal sowing (3 tillers or more per rice plant). The crop should be sprayed before flowering of the weeds. WATER MANAGEMENT: Before herbicide application, lower water level in the bays to at least 2 thirds of the weed growth for direct contact with CropSure MCPA 750 Herbicide. Weeds covered by water will not be controlled. Raise water depth to normal levels 24 hours following spraying.
Flax	Refer to Weed Table	VIC, TAS only	325mL/ha	Apply to crop when 8-20cm high.

2. PASTURES, SEED CROPS & TURF

SITUATION & CROP	WEEDS	STATE	RATE	CRITICAL COMMENTS
Grass Pastures	Refer to Weed Table	All States	460mL-2.7L/ha	Apply to established grass-based pastures. Damage may occur to legumes if present. See "Legume Tolerance" below. NOTE: Capeweed, Paterson's curse and Variegated thistle may be poisonous to stock after spraying.
	Salvation Jane	SA only	660mL/ha plus 400mL/ha Flowable Diuron	Use this mixture only if spraying is delayed until early Winter. Rosettes should not exceed 20cm diameter.
	Soldier thistle	SA only	460mL/ha-1.45L/ha	Use low rate on seedlings with no more than 2 true leaves. Use 100L of water for best results. If clover present, DO NOT exceed 575mL.
	Seedling and established Horehound	NSW, ACT, only	2L/ha	Apply in Autumn when horehound plants are at the seedling stage. If sub clover or medic plants are present, they will be damaged by this application.
Grass Seed Crops	Refer to Weed Table	QLD, SA, TAS, VIC, WA only	460mL-2.7L/ha	Apply to established grass seed crops.
Sub-clover seed crops	Refer to Weed Table	VIC, SA only	460-960mL/ha	DO NOT exceed rate specified. Spray in Autumn and early Winter.
Pastures - Spray/Graze Technique	Caltrop, Capeweed, Charlock, Mustards, Paterson's curse, Shepherd's purse, Saffron, Slender, Spear or Variegated thistle, Turnip weed, Wild radish, Wild turnip	NSW, ACT, VIC only	230-930mL/ha	Spray actively growing 6-8 week old weeds. Introduce stock 7-10 days after spraying, preferably sheep as cattle are less effective. Use stocking rate at least 5 times heavier than normal until weeds have been reduced but before survival of desirable pasture species is threatened. Lucerne and medics may be damaged and should be grazed short before spraying. Refer "Legume Tolerance" under General Instructions. PRECAUTION: An increased quantity of poisonous plants may be eaten by stock using Spray/Graze, e.g., Caltrop, Capeweed, Paterson's curse and Variegated thistle and deaths could result from causes such as nitrate poisoning. With Paterson's curse preferably graze stock soon destined for slaughter and avoid extended periods of grazing. Avoid grazing with young or breeding stock. DO NOT graze horses or pigs on Paterson's curse. Observe Withholding Periods of at least 7 days after spraying.
		TAS only	460mL/ha	
	Refer to Weed Table	WA only	610mL-1.25L/ha	
	Capeweed, Dandelion, Seedling dock, Three-cornered Jack, Geranium, Erodium, Mustard, Annual thistles, Turnip weed, Wild radish, Wild turnip	SA only	330mL/ha	
	Soldier Thistle		395mL/ha	
Turf	Refer to Weed Table	All States	330mL/ha or 2.8mL/100 m ²	Newly laid - Delay until well established or at least 2 months old. Apply in high volume to actively growing weeds. See "Legume Tolerance". Buffalo grass is more easily damaged than other grasses.
			930mL-1.8L/ha or 10-19mL/100 m ²	Established - Apply in high volume to actively growing weeds. DO NOT mow for 2 days before application. Some transitory damage may occur to fine turf grasses and strawberry clover. See "Legume Tolerance". Buffalo grass is more easily damaged than other grasses.

3. SPOT SPRAYING

SITUATION & CROP	STATE	MIXING RATES / CRITICAL COMMENTS
High Volume Spraying	All States	Use 130mL/100L of water for easy to kill weeds such as Wild turnip, Mustards and Wild radish. Use 270mL/100L of water for more difficult to control weeds such as Docks, Hoary cress and Bindweed.
Knapsack Application		Use 13mL/10L of water for easy to kill weeds such as Wild turnip, Mustards and Wild radish. Use 27mL/10L of water for more difficult to control weeds such as Docks, Hoary cress and Bindweed.

4. NON-CROP AREAS, FALLOW LAND, INDUSTRIAL & COMMERCIAL AREAS, RIGHTS-OF-WAY

SITUATION & CROP	WEEDS	STATE	RATE	CRITICAL COMMENTS
Non-Crop Areas, Fallow Land, Industrial & Commercial Areas, Rights of Way	Refer to Weed Table	All States	Refer to Weed Table	Apply at rates shown in Weed Table when weeds only are present and no crop or pasture is involved.

WEED TABLE

Where weeds are to be sprayed in a crop or pasture use only the rates given for particular crop or situation indicated under the Directions for Use table.

In most cases this will give control, however some hard to kill weeds or those in advanced stages of growth may only be suppressed. The rates listed in the Weed Table below are for use where weeds only are present and no crop or pasture is involved. Use at these rates in a crop or pasture other than for spot spraying may cause damage. This product should only be used in those states where a rate or range of rates is indicated for the particular weeds listed.

APPLICATION RATE PER HECTARE

WEEDS CONTROLLED	VIC	NSW, ACT	SA	TAS	QLD	WA	CRITICAL COMMENTS
Ball mustard	-	-	1.15L	-	-	-	Apply at rosette stage.
Bathurst burr	1.35L	660mL-1.35L	1.35L	1.35L	1.35L	1.35L	Spray young seedlings only.
Black bindweed	-	970mL-1.35L	-	-	930mL-1.35L	-	Apply at young stage prior to flowering.
California burr	-	660mL-1.35L	-	1.45L	-	-	Spray young seedlings only.
Cape tulip	-	-	-	-	-	1.35L	Apply just prior to flowering. Gives mild suppression only.
Capeweed	-	1.45L	1.45L	1.45L	1.45L	-	Apply at seedling stage.
Carrot weed	1.35L	-	-	-	1.35L	-	Apply at seedling stage.
Charlock	460mL	660mL	460mL	600mL-1.45L	460mL	-	Apply at rosette stage.
Cutleaf mignonette	-	-	1.45L	-	-	-	Apply at young rosette stage.
Dandelion	1.35L	1.35L	1.35L	1.35L	1.35L	1.35L	Apply at young rosette stage.
Dead nettle	-	1.45L	-	-	1.45L	-	Moderately susceptible. Apply at seedling stage.
Docks	690mL	-	1.45L	1.45L	-	-	Apply at rosette stage and before flower heads emerge. Only the top growth of old established plants will be affected.
Fat hen	1.35L	660mL-1.35L	-	1.35L	1.35L	-	Spray up to rosette stage.
Fennel	1.8L	1.8L	1.8L	1.8L	1.8L	-	Apply at young stage.
Field bindweed	1.35L	-	1.35L	1.35L	1.35L	1.35L	Apply at bud stage, repeating over several seasons.

WEEDS CONTROLLED	VIC	NSW, ACT	SA	TAS	QLD	WA	CRITICAL COMMENTS
Field cress	-	-	-	1.45L	-	-	Apply at young stage.
Flatweed or Cat's-ear	-	-	-	1.45L	-	930mL	Apply when weeds are 10-15cm high.
Fumitory (red)	930mL	930mL	930mL	-	930mL	-	Apply at young stage prior to flowering.
Hoary cress	3.0L	-	1.45L	-	3.0L	-	Apply before flowering.
Horehound	-	2.0L	1.45L	-	-	-	Apply at rosette stage.
Hedge mustard	730mL#	-	460mL	460mL	460mL	825mL	Apply at rosette stage.
Hexham scent or Melilotus	960mL	800mL	930mL	-	930mL	-	Apply at young seedling stage.
Lesser swinecress	-	-	-	1.45L	-	-	Apply at young stage.
Lincoln weed	-	-	460mL	-	-	-	Apply at rosette stage.
London rocket	-	-	-	-	-	825mL	Apply at rosette stage.
Lupins	-	460-960mL	-	-	-	825mL	Spray up to 10cm high.
Mintweed	1.35L	1.35L	-	-	1.35L	-	Spray young seedlings only.
Mustards	730mL#	660mL#	730mL	730mL	-	825mL	Spray up to rosette stage.
Noogoora burr	1.35L	660mL-1.35L	1.35L	-	1.35L	1.35L	Spray young seedlings only.
Opium poppy	-	-	-	1.45L	-	-	Apply at young stage.
Paterson's curse	-	660-960mL	-	-	2.7L	-	Apply early rosette stage.
Pimpernel	-	-	460mL	-	-	-	Apply at rosette stage.
Plantains	-	1.35L	-	1.35L	1.35L	-	Apply at young stage.
Rapeseed	-	660-960mL	-	-	-	-	Spray up to rosette stage.

#: refer to Critical Comments for Wheat, Barley, Oats, Triticale

**NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL
UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

WITHHOLDING PERIODS:

CEREALS PASTURE:

DO NOT GRAZE OR CUT FOR STOCK FOOD FOR 7 DAYS AFTER APPLICATION

HARVEST:

NOT REQUIRED WHEN USED AS DIRECTED

OILSEED POPPIES:

DO NOT HARVEST FOR 5 WEEKS AFTER APPLICATION

GENERAL INSTRUCTIONS

Weeds should be sprayed while actively growing and at their most susceptible stage. As a general guide, annuals should be sprayed when young and perennials just prior to appearance of bud stage. Extremes of cold or drought are unfavourable. The best conditions are when the soil is moist, weather fine and rain unlikely within 6 hours of application. DO NOT spray crops or weeds outside the stages indicated

in "Critical Comments" as damage, loss of yield or inadequate weed control may result. DO NOT spray in high winds.

APPLICATION AND MIXING INFORMATION

This product mixes readily with water. Half fill the spray tank with clean water and add the required amount of product. Agitate thoroughly before adding the remaining water.

Boom Spraying:

Use 30-120L water per hectare.

Use minimum of 170L water per hectare for LINSEED.

Aerial Spraying:

Use 10-90L water per hectare.

RESISTANT WEEDS WARNING

GROUP 4 HERBICIDE

CropSure MCPA 750 Herbicide is a member of the Phenoxys group of herbicides. CropSure MCPA 750 Herbicide has the Disruptors of plant cell growth mode of action. For weed resistance management CropSure MCPA 750 Herbicide is a Group 4 herbicide.

Some naturally occurring weed biotypes resistant to CropSure MCPA 750 Herbicide and other disruptors of plant cell growth herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by CropSure MCPA 750 Herbicide or other disruptors of plant cell growth herbicides.

Since the occurrence of resistant weeds is difficult to detect prior to use, CropSure Pty Ltd accepts no liability for any losses that may result from the failure of CropSure MCPA 750 Herbicide to control resistant weeds.

EQUIPMENT MAINTENANCE AND USAGE

Equipment that has been used for this chemical should NOT be used for the application of other materials to sensitive plants unless it has been cleaned with Spraymate Tank & Equipment Cleaner or well washed out with a 2% solution of cloudy ammonia followed by several clear water rinses.

COMPATIBILITY AND TANK MIXES

This product can be tank mixed with Diflufenican, Ally*/Associate®, Kamba®, Bromicide®, Flowable Diuron, Archer®, Sertin*, Diquat/Paraquat (For example CropSure Squadron 250 Herbicide), Flowable Terbutryn, Tordon* and Tribunil*. The effectiveness of Imidan*, Le Mat*, Metasystox* and Dimethoate may be reduced by alkaline hydrolysis if tank mixed with this product. For these situations the addition of LI 700® is recommended. When tank mixing add the required amount of compatible product (and surfactant if recommended) when the spray tank is nearly full and while continuously agitating. If left overnight, agitate thoroughly before spraying.

® Agritone, Archer, Associate, Kamba and Bromicide are registered trademarks of Nufarm Australia Limited

* Other registered trademarks

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

DO NOT spray in high winds.

PROTECTION OF LIVESTOCK

LOW HAZARD TO BEES.

May be applied at any time as recommended in the Directions for Use table.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate dams, rivers or streams with the product or used container.

DRIFT WARNING

DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Avoid spray drift onto susceptible crops such as cotton, tobacco, tomatoes, vines, fruit trees, vegetables, legume crops and pastures, oilseed crops and susceptible trees (e.g. kurrajongs, belahs, eucalypts).

LEGUME TOLERANCE

The use of CropSure MCPA 750 Herbicide is preferred to 2,4-D Amine or Ester in situations where legumes are undersown in the crop.

NB: The tolerance of pasture legumes to applied product can vary with species, variety, growing conditions, stage of growth and companion crop cover. DO NOT spray cereal crops undersown with lucerne as damage may result.

RE-ENTRY PERIOD

Hand weeding should NOT be performed for 7 days after spray application unless workers wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), chemical resistant gloves and footwear.

STORAGE AND DISPOSAL**KEEP OUT OF REACH OF CHILDREN**

Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight.

Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty containers 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory Government Regulations. Do not burn empty containers or product.

For Mini Bulk Returnable Containers

Store the original sealed Envirodrum in a dry, cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the Envirodrums with water or any other foreign matter. After each use of the product, please ensure the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrums have been used, please return the empty Envirodrums to the point of purchase. The Envirodrum remains the property of CropSure Pty Ltd.

For Refillable Containers

Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

SAFETY DIRECTIONS

Harmful if swallowed. Attacks eyes. Will irritate the skin. When opening the container, preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and goggles. If product on skin, immediately wash area with soap and water. If product or spray in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms, and face thoroughly with soap and water. After each day's use wash gloves, goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126, New Zealand 0800 764 766.

SAFETY DATA SHEET (SDS)

Additional information is listed in the Safety Data Sheet (SDS), which is available from the supplier.
